

The City of Nelson  
**WATER QUALITY ADVISORY**  
**RESCINDED**

Date: May 28, 2018

After consultation with the Interior Health Authority, the Water Quality Advisory issued on May 9, 2018 due to Elevated Turbidity Levels (cloudiness) is now rescinded. It is **safe** for all residents serviced by the municipal water system to drink their tap water. The elevated turbidity in our source water, resulting from weeks of warm temperatures and rapid snowmelt from a historically deep snowpack, has decreased to a level where water quality is no longer degraded.

The City continues to monitor water quality at our source and throughout our system however, a significant amount of high mountain snowpack remains to melt. Should water quality change, we will post any future notices on the City's website, through social and print media, radio, and via telephone to users deemed to be at unique risk.

**INQUIRIES?**

**City of Nelson – Works & Utilities Complex – 250-352-8238**

**PLEASE SPREAD THE WORD TO YOUR NEIGHBOURS**

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly [for example: people in apartments, rental units, nursing homes, schools, preschools, churches and businesses]. You can do this by posting this notice in a public place or distributing copies by hand or mail.
